

HEXAGON

empowering an autonomous future

Autonomy in buildings & infrastructure

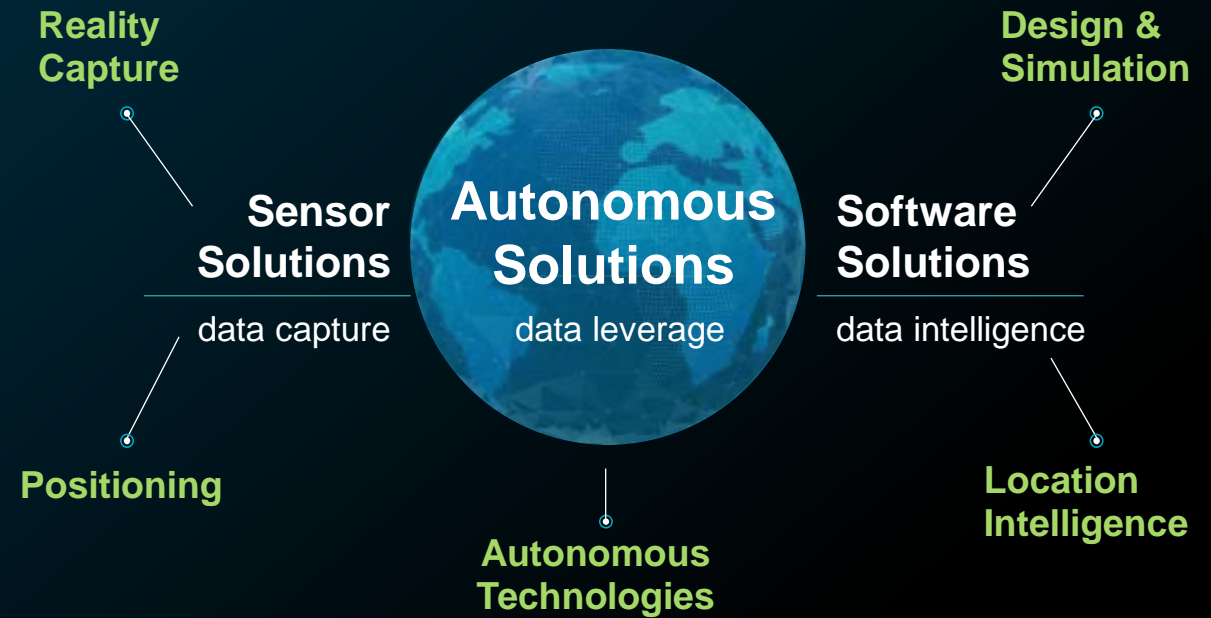

Burkhard Böckem | CTO

Thomas Harring | President, Geosystems division

The importance of autonomy

Solving challenges in the world's most complex ecosystems

With solution offerings that drive sustainable value creation

Core Capabilities

Sensor Solutions

Reality Capture | Positioning

Autonomous Solutions

Autonomous Technologies

Software Solutions

Design and Simulation | Location Intelligence

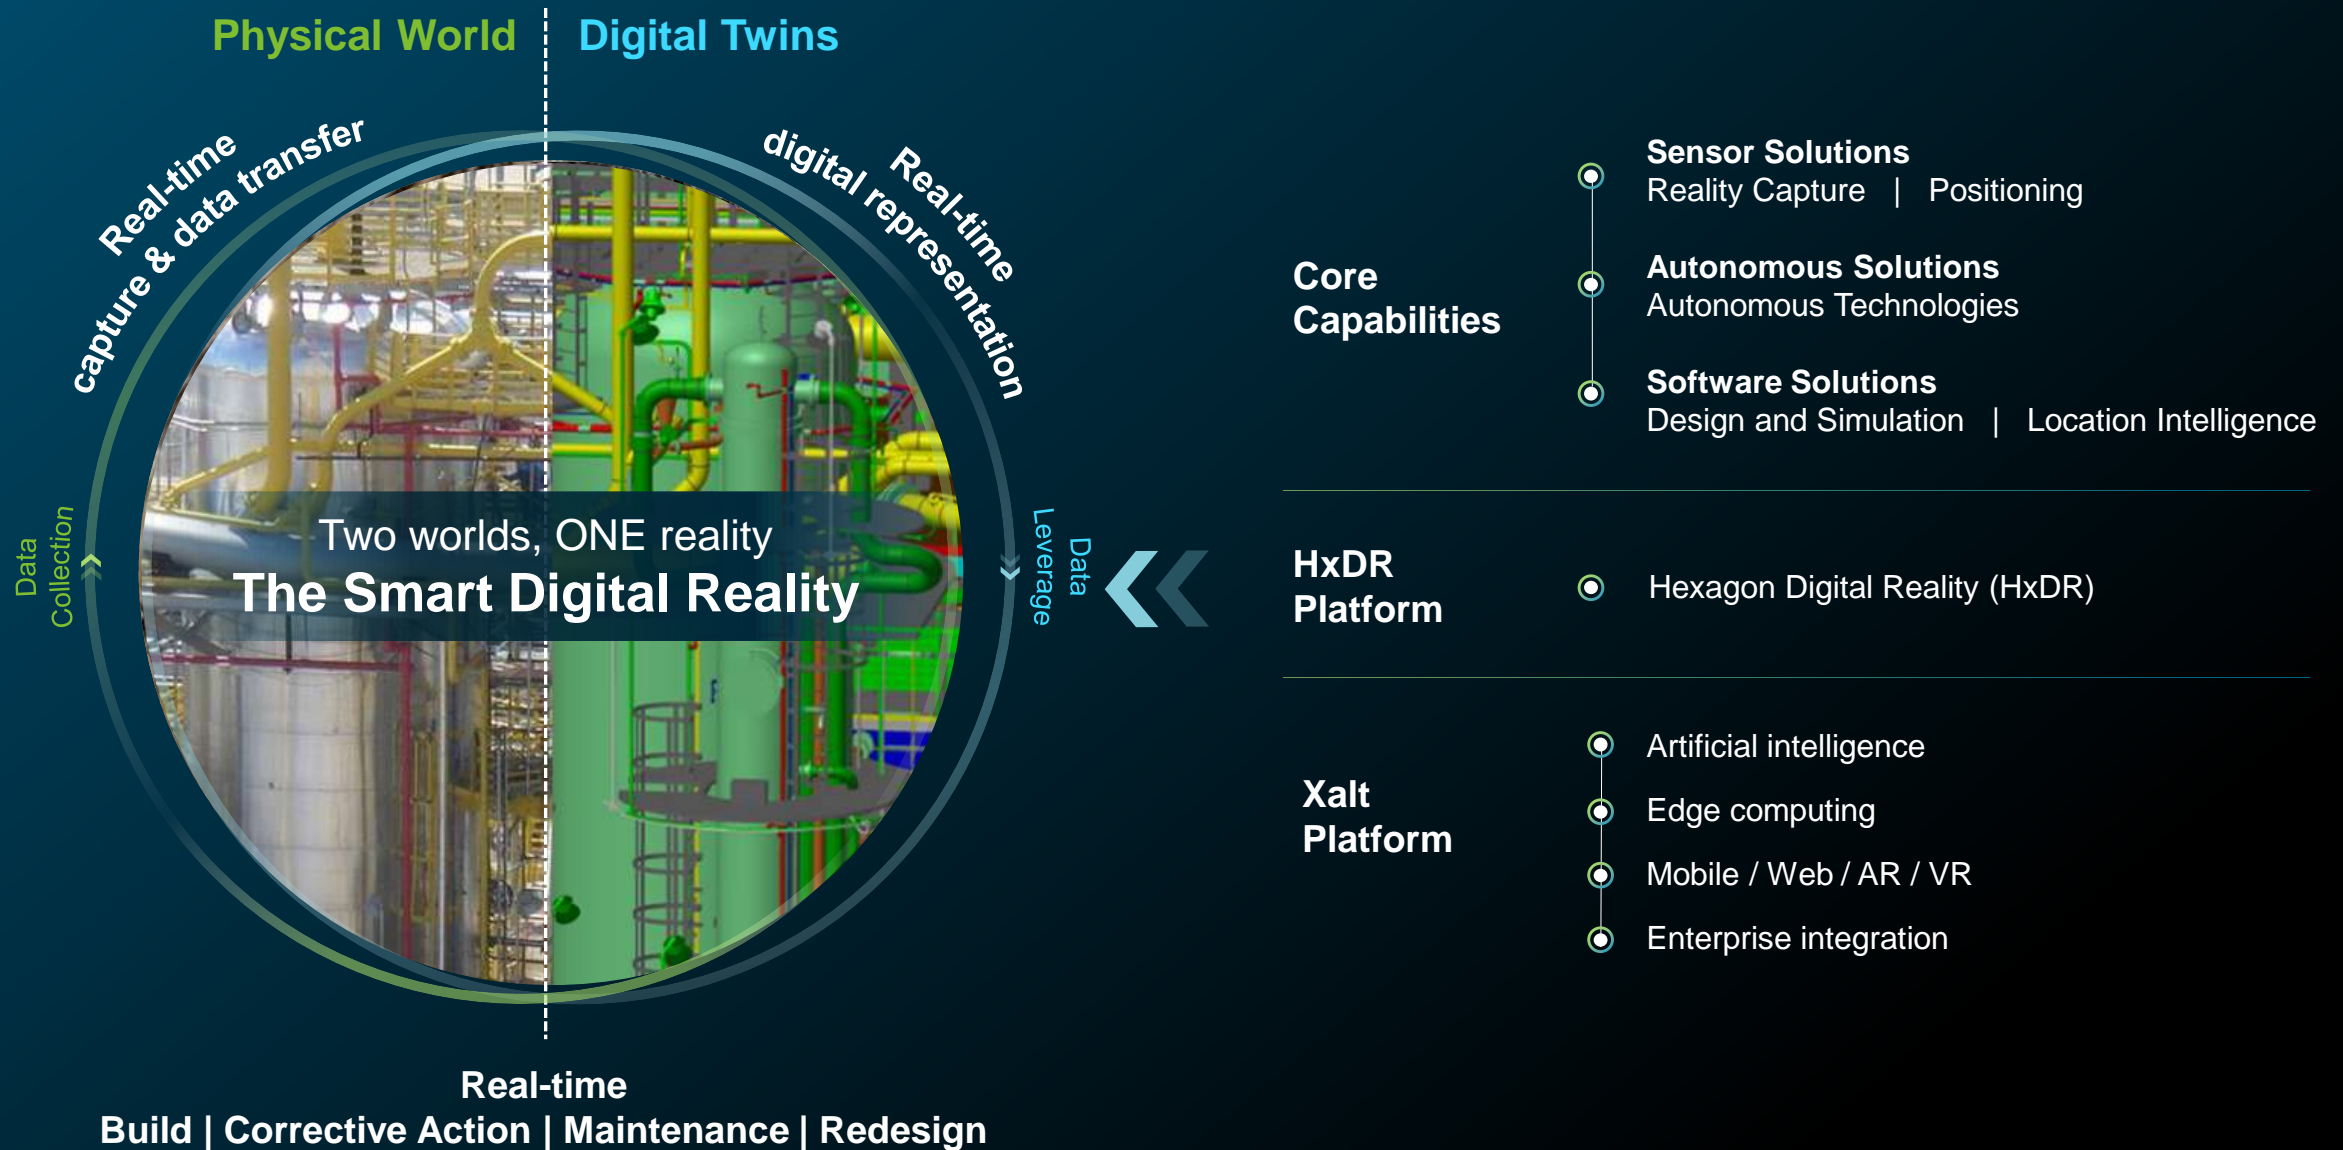

HxDR Platform

- Hexagon Digital Reality (HxDR)

Xalt Platform

- Artificial intelligence
- Edge computing
- Mobile / Web / AR / VR
- Enterprise integration

Solving challenges in the world's most complex ecosystems

The Smart Digital Reality

What do we mean by autonomy in reality capture?

Robots & Platforms

Sensors

AI-based Software

GrandSLAM technology as in the Leica BLK2GO

GrandSLAM – Perception, Navigation and Reality Capture

As enabling core technology for autonomous systems

DUAL AXIS LIDAR

IMAGING

GRANDSLAM

Trajectory (green)
LiDAR point-cloud (colored)

5 min

Please mark the corners of the area you want to scan. X

Surface planning mode is active.

HxDR
DIGITAL REALITY

- Point-cloud
- Mesh (automated)
- Panoramic and spherical imagery
- Progress Reporting (Planned)
- Deviation Analysis (Planned)

Navigate to Boarding

Flight number: LH 0370
Boarding time: 12:45

Gate 22A

Wheelchair accessible route

Start navigating

Pairing technology with domain expertise in buildings & infrastructure

The future is already here – it's just not evenly distributed"

- William Gibson

Powering innovation for a sustainable future

> 50% cost overrun for
large public projects

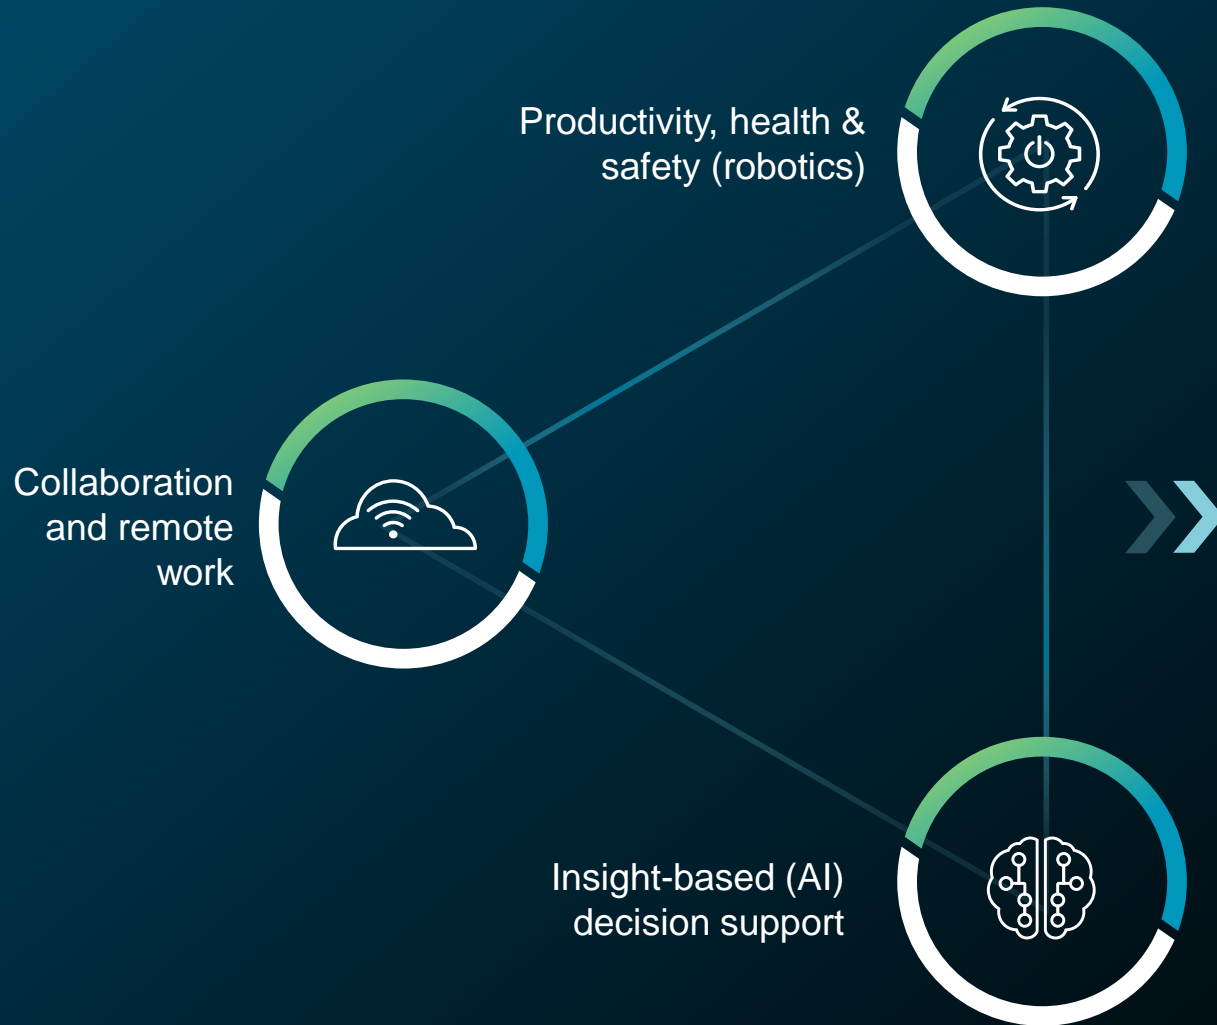

> 50% non-value add
activities in construction

> 40% of world's
carbon emissions

Digital transformation is gaining momentum as innovation gets faster

Site Safety with AI-insights

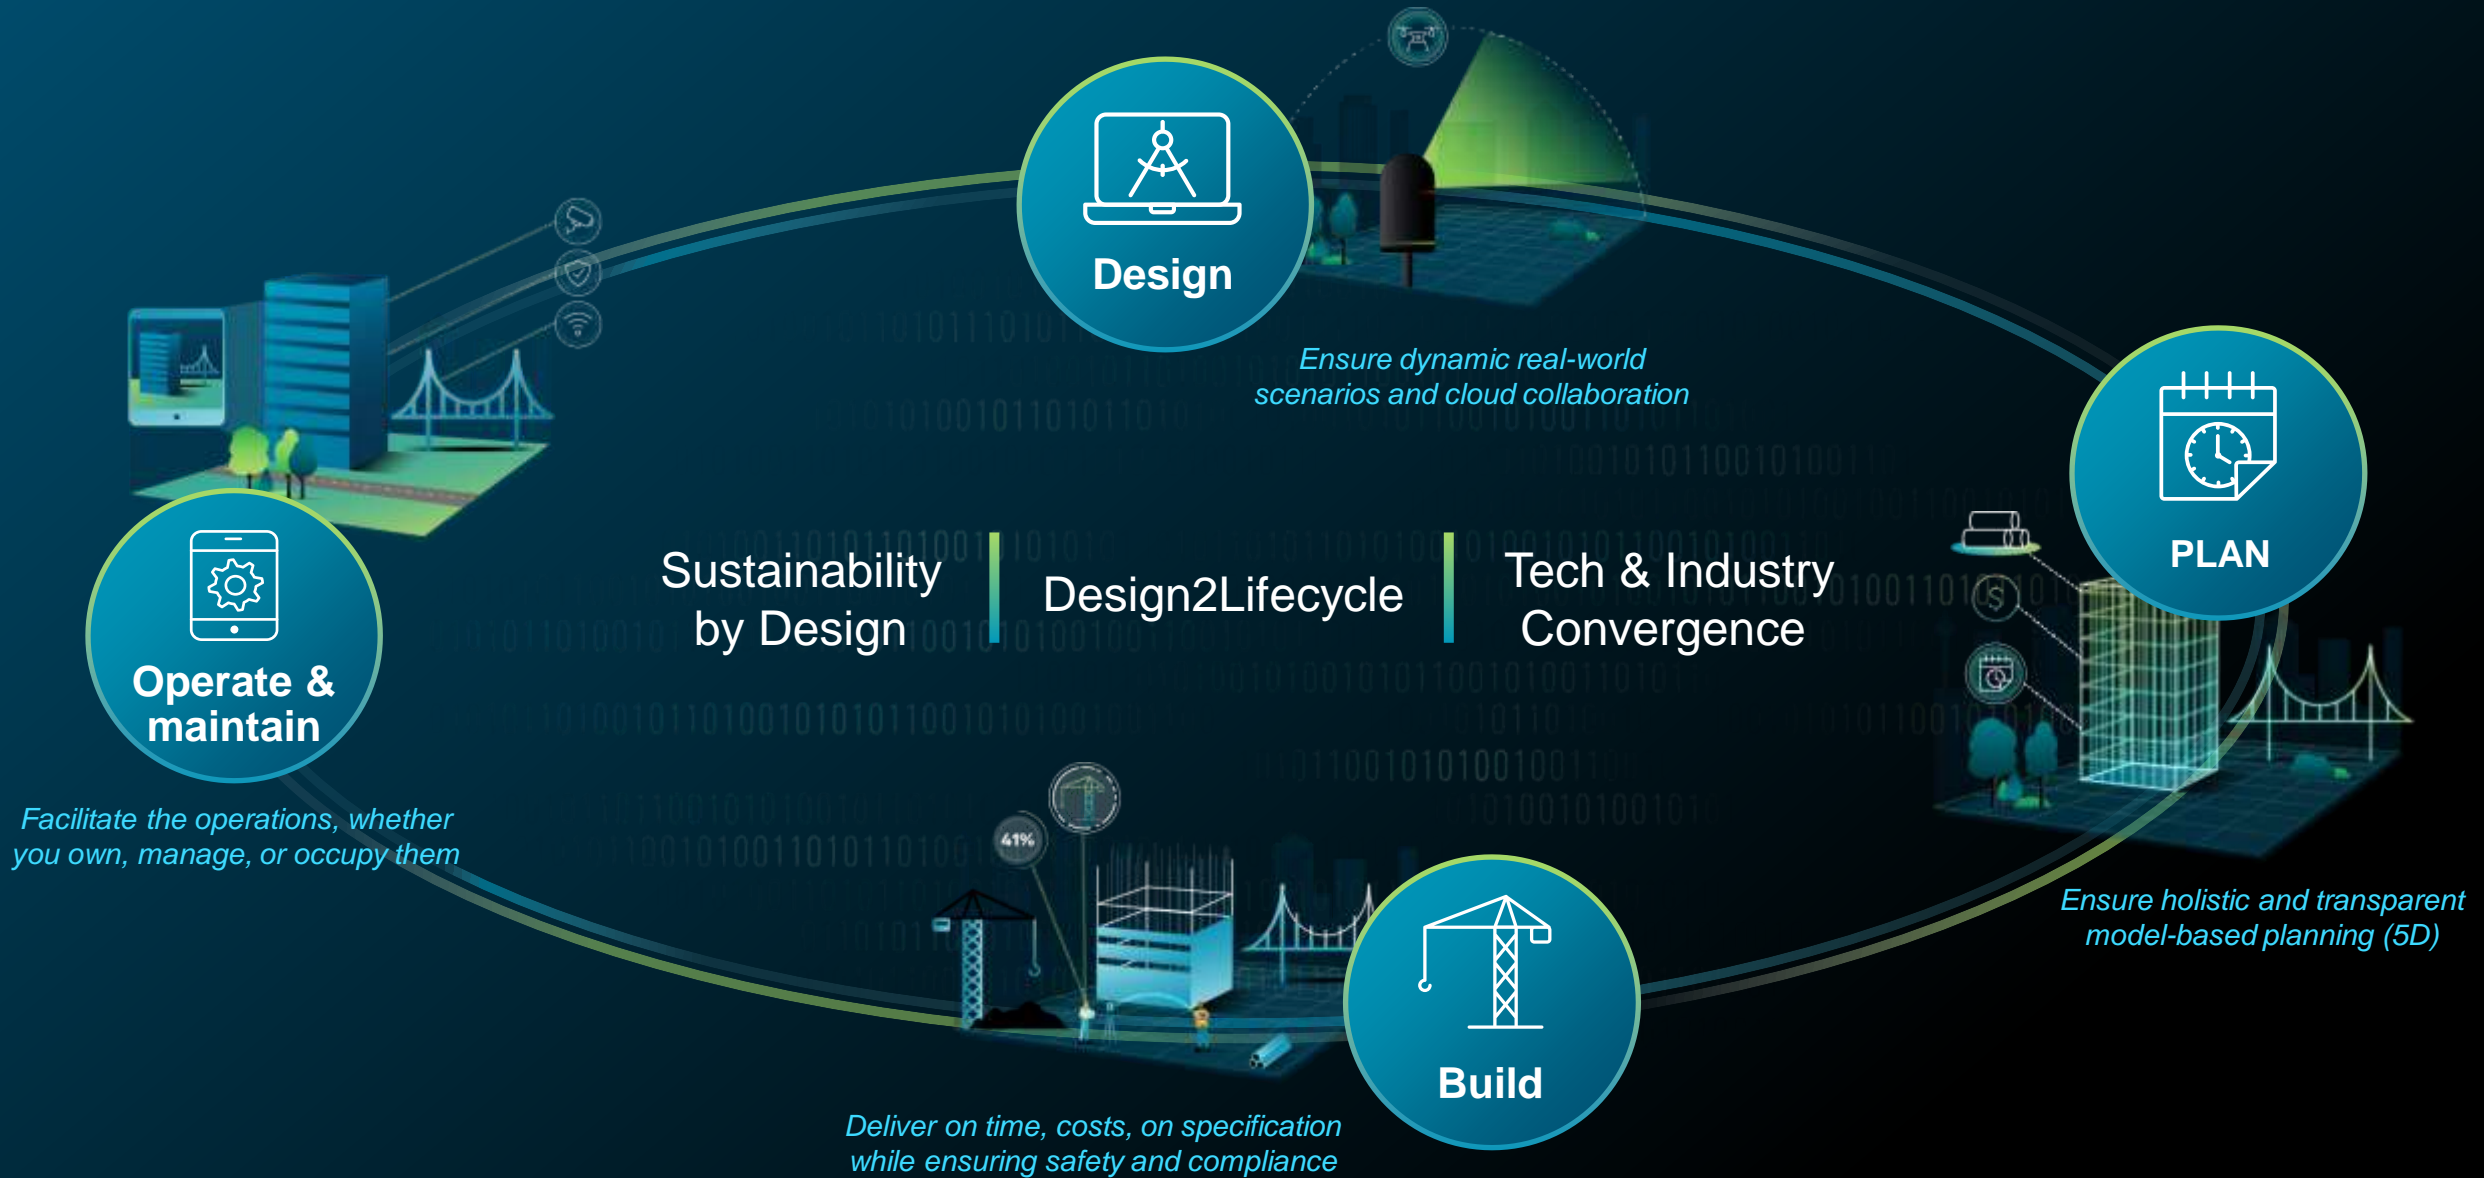

AI-detected
safety issue
on site

Management
dashboards to
benchmark site safety
across multi-
construction sites

Putting data to work throughout the asset lifecycle with Smart Digital Realities

Connecting design and planning with the real world

Beyond static geospatial data to Content as a Service streaming

Real-world environment

Access to real-world data / existing conditions

Design and Planning environment

Cloud collaboration and workflow automation

Connecting planning to construction with safety in mind

Beyond 3D machine control – automating site work *and* safety

Site productivity
The future of excavating

Site safety

A productive and safer construction site

Infinitively connecting field and office

A constant feedback loop between the real and digital worlds

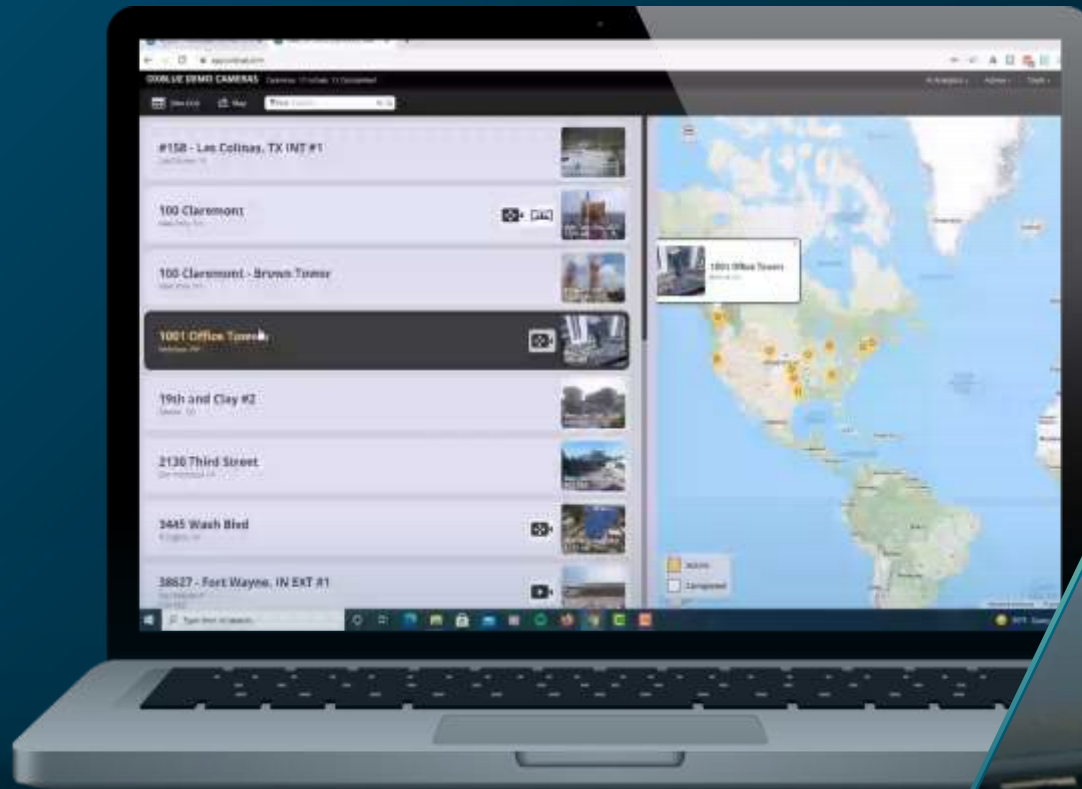

Reality capture – made easy
Ability to measure what you see

Field/Office SW – always on
Keeping digital realities of
sites up to date

Enabling jobsite intelligence with AI-powered insights

An all-in-one 'Sensor & SW as a Service' – connecting field and office

Multi-project productivity / safety insights

Job site monitoring
Project equipment tracking and more

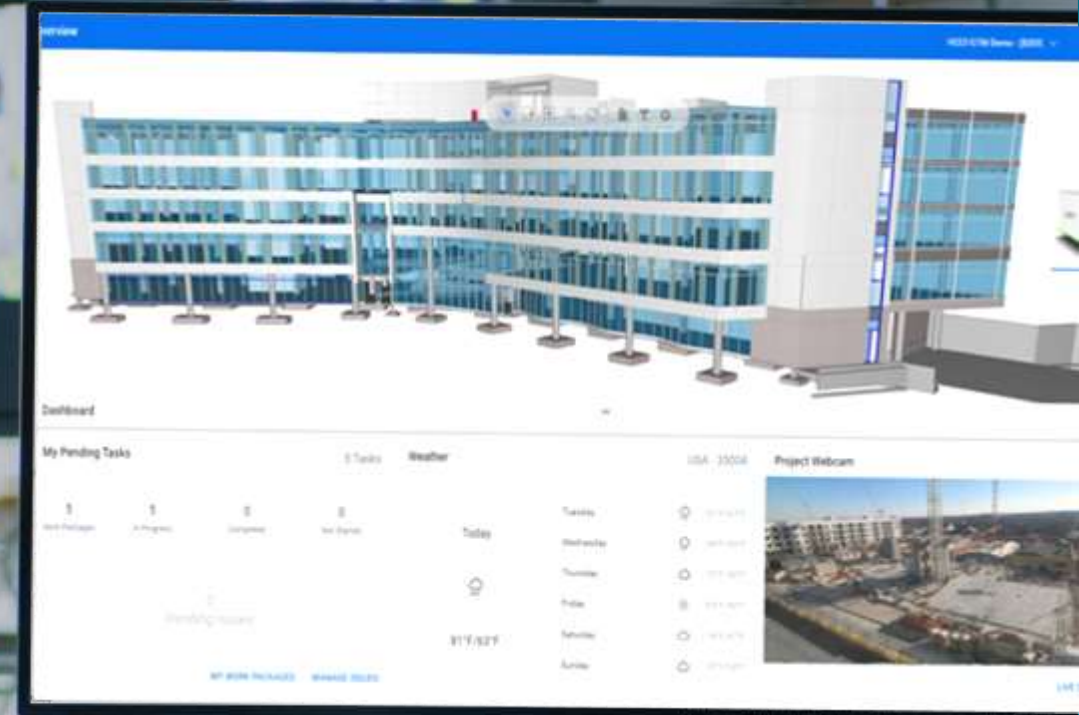

Ensuring construction as planned

Real-time verification and issue management

Jobsite monitoring and security

Progress documentation and issue management

Up-to-date Digital Reality
True 5D construction management

Facilitating operations

Prolonging the life of assets and ensuring indoor navigation

Handover

Digital realities of "what is"

Predictive Maintenance

Location-based asset tracking

Taking reality capture to the next level – autonomously!

Autonomous agility and speed for any reality capture workflow

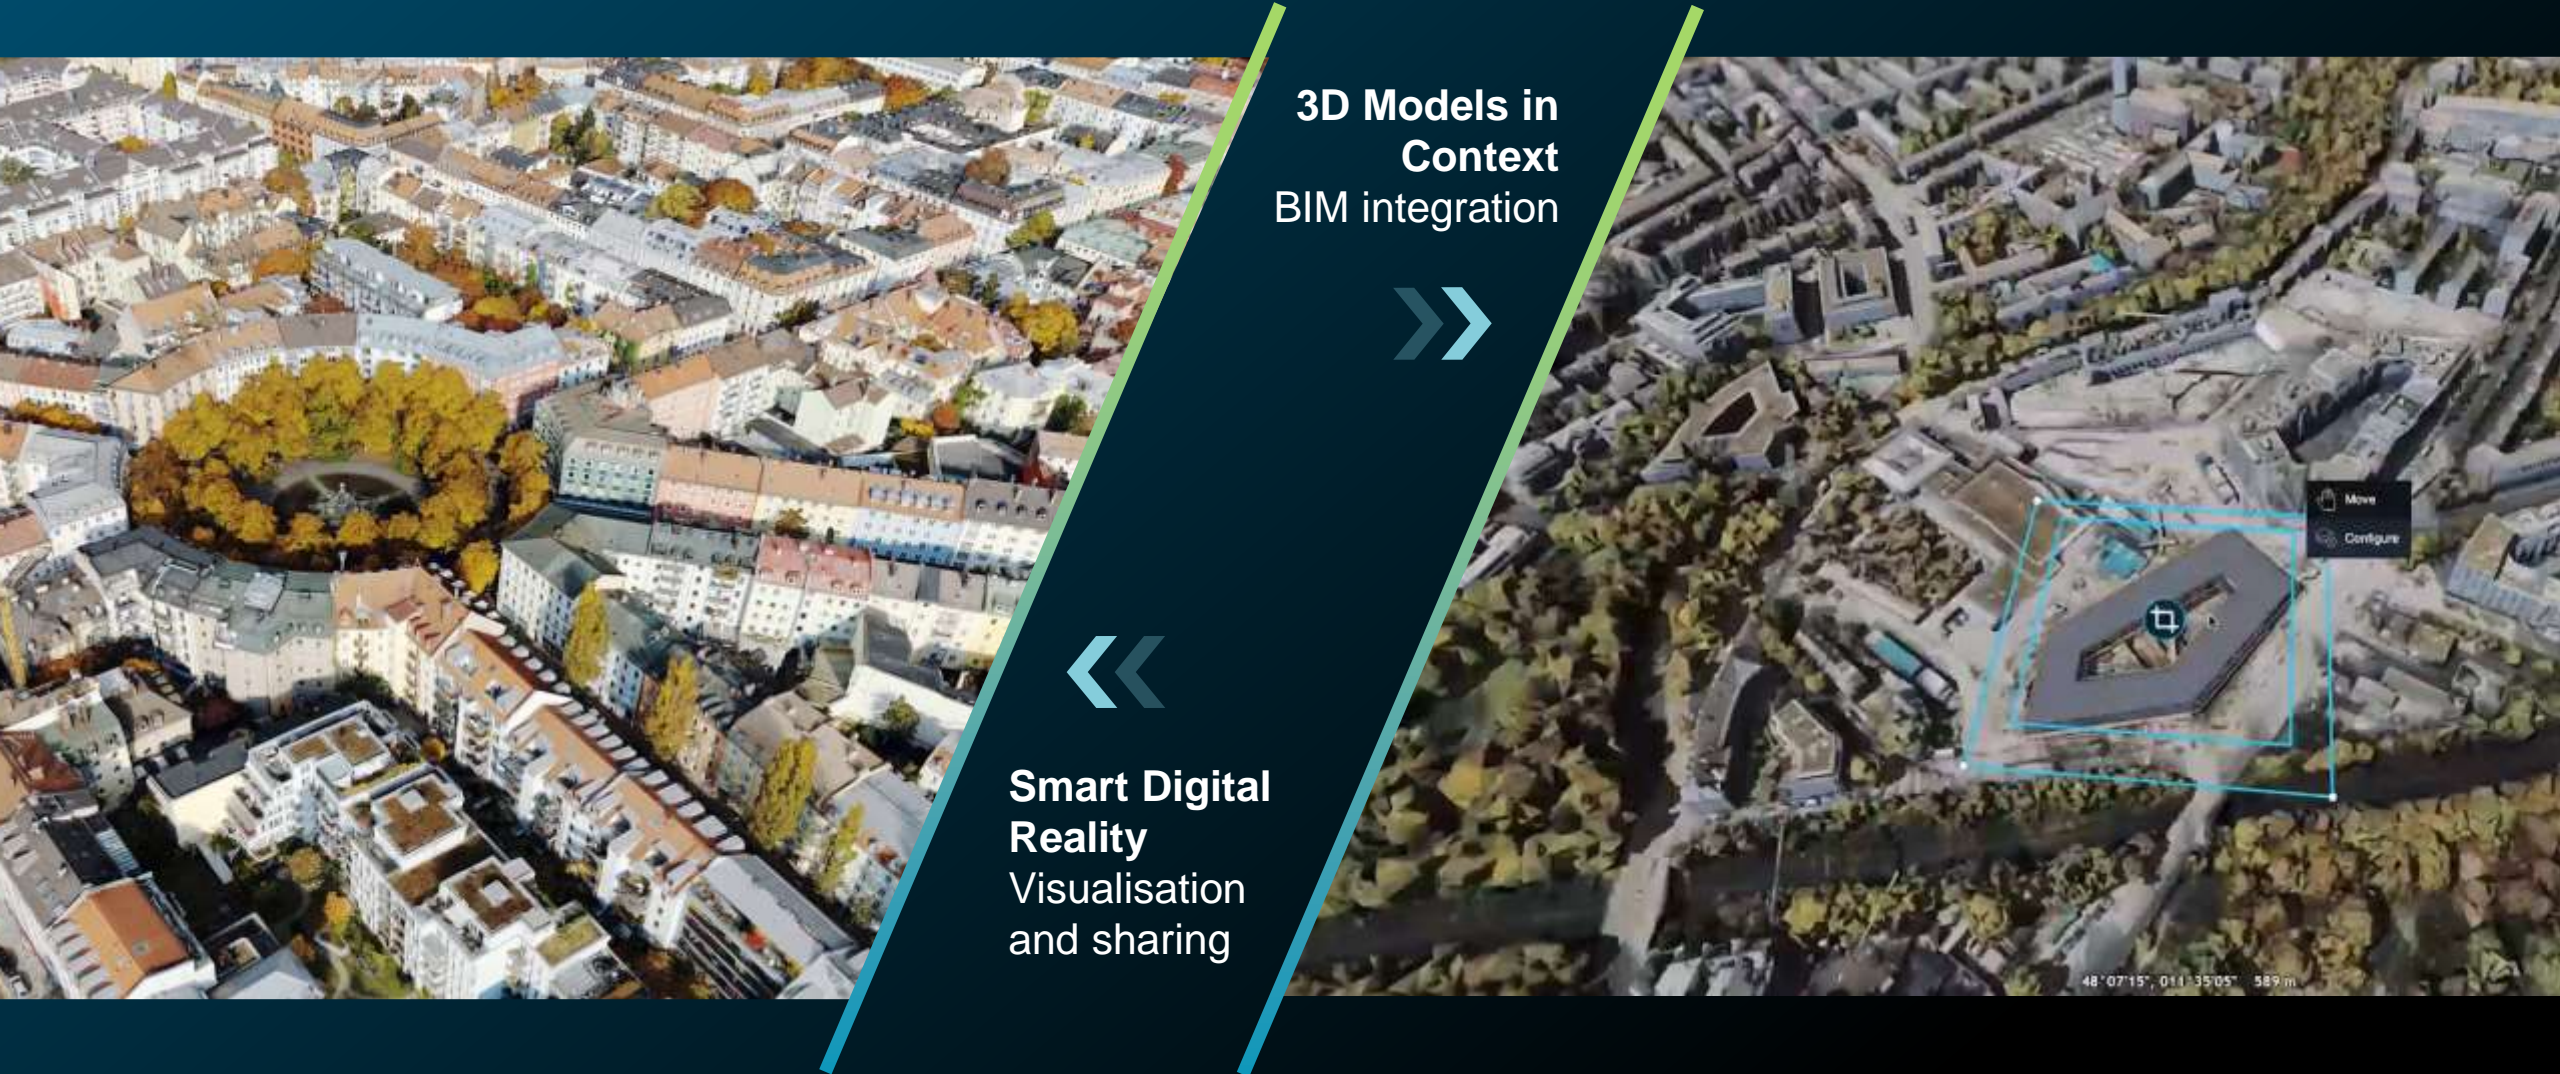

Leica BLK2FLY
to capture Rail infrastructure

Leica BLK ARC
to capture Train station

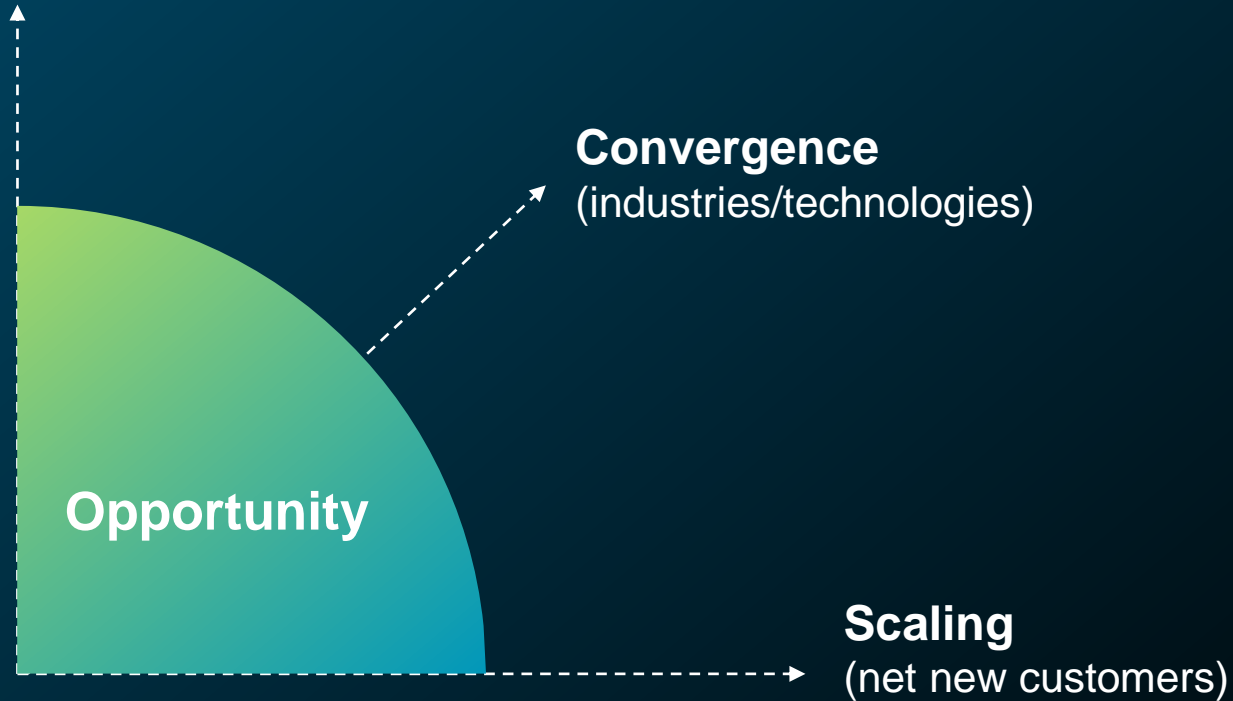

Smart Digital Realities are the key to unlocking true value

Precise insights and immersive experiences

Endless opportunities in and beyond Buildings and Infrastructure

Enhancing
(integration)

Portfolio
transformation

Innovating for a
sustainable future

Create
opportunity
